

Data Viz Recreation Instructions

Jake Rozran

2/17/2022

Overview

Due: Week 10 (March 15 & 17)

Teams: You may choose your team of 2; will be randomly assigned on Tuesday (if you don't have a partner)

Presentation Order: Will be randomly selected

Presentation Length: 16 minutes

Instructions

1. Find a data visualization and the data to build it
 - I recommend using the Makover Monday (MoM) Website
2. Recreate the visualization in R as closely as possible
3. Show the original
4. Walk through the steps you've taken to recreate it
5. Show the end results
6. Discuss the shortcomings you'd like to address
7. Submit the slides and RMarkdown code to Blackboard (**BEFORE** you present)

Evaluation

You'll be evaluated on how close you've come to the data viz you've selected and how well you're team worked together (I'm still working out how to evaluate that).

As a gentle reminder, this project is worth 20% of your final grade.

Presentation Order

order	student	day
1	Ray & Claude	day 1
2	Zhipeng & Aelia	day 1
3	Erin & Fiona	day 1
4	Braeden & Sofia	day 1
5	Jack & Nate & Kevin	day 2
6	Catherine & Sarah & De'ana	day 2
7	Andy & Andrew	day 2
